XyEnterprise XML Web Services Powers Publishing Solution for LexisNexis UK

Enterprise Publishing Technologies Produce Significant Results

READING, MA - October 1, 2003 - XyEnterprise, the leading developer of XML content management and enterprise publishing software, announced today that its XML Professional Publisher (XPP) Web Services technology has been deployed to support a sophisticated XML content management and publishing solution for LexisNexis UK. This solution supports LexisNexis UK in the seamless publishing and delivery of its well-known legal, tax and regulatory services and publications to a wide variety of customers and markets.

The XyEnterprise Web Services-based system, in production use for Case Reports, enables LexisNexis UK to deliver editorial content from their Content@ Content Management System (also provided by XyEnterprise) to Letterpart, a UK based publishing services provider. Letterpart hosts the XPP application that composes the source XML data for final print and PDF publication. Through the Web Services interfaces, LNUK editors have the ability to proof, modify, and publish their documents in a browser from virtually any location. Letterpart is located in Reigate, Surrey .

"XyEnterprise's XPP Web Services technology adds even more versatility to our XML-based publishing process, particularly for editors working in remote locations," says Phil Caisley, Editorial Systems Manager at LexisNexis UK. "Overall, the system allows us to produce our complex publications in a timely, cost-effective manner."

Chris Leggett, Managing Director of Letterpart, says, "The use of Web Services brings XPP's powerful automated composition directly to LexisNexis UK and has enabled us to better serve an important customer while realizing the benefits of a more automated process."

Richard Pasewark, vice president of Sales and Marketing, XyEnterprise, says that XPP Web Services can enhance publishing efficiency and workflow across a variety of organizations and industries.

"Content@ and XPP have proven themselves in the most demanding military, government and commercial XML applications," says Pasewark. "Adding our Web Services technology eliminates geography as a constraining factor in collaborative content creation, editing and publication."

Learn More About this Solution

XyEnterprise, LexisNexis, and Letterpart will host an on-line Web seminar "Applying Web Services to Enterprise Publishing" on November [6, 13, or 20] at 10 AM EST. This presentation, originally delivered at the Seybold San Francisco conference in Sept 2003, highlights the case for and benefits of Web Services in an enterprise publishing environment. This Web seminar will include a live demonstration of the XPP Web Services -based production solution. Register now at <http://xyenterpriseevents.webex.com/>.

About LexisNexis UK

LexisNexis UK is the United Kingdom's leading professional publisher, which for nearly two centuries has been providing the legal, tax and allied professions with 'must-have' information in the form of books, loose-leaf works, encyclopaedias, reports, periodicals, and journals. LexisNexis Butterworths Direct is the UK's premier online information resource for law and tax professionals, bringing market leading law and tax information directly to the desktop to helping customers maintain their competitive edge by keeping abreast of change as and when it occurs. LexisNexis UK is part of the LexisNexis Group.

About Letterpart Limited

Letterpart Limited (based in Reigate, Surrey) is one of the leading typesetting companies in the UK. The organization has a wide range of clients, ranging from LexisNexis UK to bespoke publications such as Wisden's Cricket Records for Headline Book Publishing. The work carried out by Letterpart involves either complex formatting or large volume output and includes, in addition to legal publications, dictionaries, reference titles, and novels. Many publications are produced in loose-leaf format or contain very high tabular content.
